carsharing

Fleet Complete's carsharing solution helps public- and private-sector fleets reduce under-utilization of vehicles, cuts down on time-consuming admin work, and provides managers with a comprehensive overview of vehicle usability.

Main Features

- Easy-to-use mobile app for simple vehicle booking.
- Automated notifications, so drivers and passengers get an alert in their inbox.
- Access cars with just a smartphone.
- Detailed analytics and comprehensive reporting enable smarter decision-making.

Key benefits

- Cut vehicle costs and improve efficiency by identifying under-utilized vehicles and removing them from the fleet.
- Reduce excessive vehicle wear by automatically balancing usage across the fleet.
- Save time and reduce admin with Fleet Complete's automated vehicle allocation and keyless entry.

Target Groups

- Any organization with 5+ business-owned pool vehicles.

Value

- Estonian Railroad (Eesti Raudtee) enjoyed savings of €500,000/year once they implemented carsharing.
- A multinational telecoms company reduced their vehicle fleet by 50%, saving costs and improving efficiency, thanks to carsharing.
